

D & S WINDOW SOLUTIONS

WINDOWS | DOORS | CONSERVATORIES

About D & S WINDOW SOLUTIONS

D & S Window Solutions, based in the heart of Essex and covering surrounding counties and London, is family owned and operated offering exceptional windows, doors and conservatories.

We are a professional double glazing team with more than 40 years experience.

We carry out all work big or small to high standard with guarantees included.

HomePro Registered

The HomePro Group has specialised in the home improvement industry for almost thirty years and has become the UK's leading provider of home improvement deposit protection and insurance backed guaranteed products.

An **Insurance Backed Guarantee (IBG)** is a cost effective, long term insurance policy, which provides valuable protection for consumers when undertaking home improvement projects such as double glazing.

A HomePro Insurance Backed Guarantee (IBG) will protect your financial investment by matching the terms of your contractor's original guarantee should they have ceased to trade. So, if they are no longer in a position to honour a claim – your project may still be protected.

The IBG can protect your project from deposit to completion and beyond possibly even when the work is in progress.

HomePro can even help you to find a new, approved contractor to commence or recommence the project, if your original contractor fails to complete.

Certass Registered

D&S Window Solutions Ltd is proud to be a **Certass qualified company**.

If you choose an installer that's registered with Certass Competent Person Scheme, it means that they have all the correct systems in place so that they meet the requirements to self-certify their work and provide the best service and installations for you.

These include a **skilled and trained workforce, management systems** and processes and also **consumer financial protection**.

Why choose us?

We believe that the customer is always right and we tailor our products to match your exact requirements.

Whatever your requirements, property type and budget, our dedicated team will work with you from step one to make your ideas become a reality.

This begins with an on site survey.

How do I arrange a survey?

Click on the **"Download Brochure"** button to view some of the products and brands we supply and fit. Click on the **"Get Quote"** button at the side of the screen to request a survey or callback so we can discuss your requirements in further detail.

Once we have all the information we need on your project we will send you a **no-obligation electronic quote** which you will receive as an email from WinQuote. You can easily accept this quote, reject it, or direct message us to ask us any questions about it.

Things to consider when buying Windows, Doors and Conservatories

Do you need planning permission?

When installing a conservatory, planning permission isn't usually required. You're only likely to need planning permission if your conservatory will cover more than **half the area surrounding your house**, or if the conservatory roof is higher than the highest point of your existing property.

You must also obtain planning permission before you build on raised platforms such as **verandas and balconies**.

Energy Ratings

The Window Energy Rating system tells you how energy efficient a window is. Windows are given an energy rating on a scale of G to A+, with **A+ windows being the most energy-efficient**.

If saving money on energy bills is important to you and you want a warmer home then it goes without saying that you should try and buy the most energy efficient windows you can afford.

Reputation

As always, buy from a reputable business. There are lots of great companies out there but others that are less reputable.

Don't be afraid to **check out our reviews** online and in our app account to see what our past customers have to say about us.

Use BM Trada, Certass and Fensa registered glaziers

CERTASS
bmtrada

It's a good idea to choose a double glazing installer that is registered with a competent person scheme, such as **BM Trada, Certass or Fensa**. Membership means that companies can self-certify their work complies with building regulations. It also means the work is covered by an insurance-backed guarantee if it's not compliant and the company goes bust.

In England and Wales, new and replacement windows must meet a certain level of energy efficiency. You need to get a certificate to show your windows comply with these regulations. An installer registered with one of the self-certification schemes will issue this certificate for you - otherwise your council will need to come and check the work.

COMPOSITE DOORS

Composite Doors provide leading security and insulation standards, in a made-to-measure package that is virtually maintenance free.

Composite doors are made from a variety of strong materials, resulting in a door that is highly secure, thermally efficient, weather-resistant and durable.

With a reputation for durability and resistance to scrapes, composite doors combine modern materials for exceptional quality.

They also come with an insulating foam core, keeping the heat indoors for a more comfortable environment.

PATIO DOORS

✓ Locking mechanisms

✓ Double Glazed

The technical design of the Sliding Patio Doors make them ideal for large-span areas and situations where bi-folding doors may not be so appropriate, such as areas exposed to high winds or upper floor apartments.

A Sliding Patio Door will offer you the largest uninterrupted glass area and once open doesn't take up room on a patio or balcony, or inside the home.

FRENCH DOORS

✓ Complete range of colours

✓ High Performance

Our high quality uPVC French doors can seamlessly join inside and outside living spaces.

French doors offer the ideal solution to bifolding and patio doors when there is a limited aperture size, or the build requires a more traditionally styled door.

BI-FOLDING DOORS

Bi-folding doors create the best panoramic views from your living space. By neatly folding and sliding open they provide a smooth transition between indoor and outdoor living.

Can be used as either an alternative to sliding doors, or to open up an entire wall as part of a conservatory; the system will make the most of a beautiful view or bring a garden into the home.

UPVC WINDOWS

Our advanced double-glazed windows systems have features which will keep you and your family warm and secure whilst still looking stylish for many years.

Having new double-glazed windows can radically reduce outside noise levels in your home by as much as half to create a quieter, more tranquil home.

- ✓ Casement Windows
- ✓ Flush Sash Windows
- ✓ Tilt & Turn Windows
- ✓ French Windows
- ✓ Bi-Fold Windows
- ✓ Bow & Bay Windows

FLUSH SASH TIMBERLOOK RANGE

Timberlook is a PVCu window system that successfully replicates traditional and heritage designs, making it ideal for historic and conservation projects.

Our flush sash windows and doors are also suitable for modern living, as they are energy-efficient and virtually maintenance free.

- ✓ Greater longevity
- ✓ Wide selection of colours
- ✓ Secure locking system
- ✓ Minimal appearance

ENERGY-EFFICIENT CONSERVATORIES

A Conservatory not only enhances the look of your home, it becomes your view on the world, a place to be with friends and family and a heaven of peace and tranquility.

Today with the new technical innovations in the structure they are virtually a house extension, so if you are thinking of extending your home it's worth considering a conservatory.

✓ There are so many choices available from a contemporary look to a classic traditional style, and can be tailored to meet all requirements.

Edwardian

Lean-to

Combination

Victorian

Double Hipped

Gable

ROOF LANTERNS

- ✓ The UK's strongest roof system
- ✓ Available in all RAL colours

Atlas Lanterns are designed with architectural principles in mind. Equally slim sightlines throughout the lantern mean it's proportionately perfect, offering you visible elegance inside and outside.

The innovative versatility of an Atlas roof means you're not limited by shape. Choose from the following options to get the perfect lantern for your space.

FLAT ROOFLIGHT

- ✓ No bars, more stars!
- ✓ Less is definitely more

Looking for a sleek, frameless look with no bars interrupting your view?

With unrivalled looks and thermal performance, the Atlas Flat Rooflight is designed to throw maximum light into your home.
